

WPS no.: **783-6 & 783-12** dated **2018-06-27**

Wolfgang Beth GmbH & Co. KG

is certified on the basis of the test welds and tests supervised by DNV GL SE that these were carried out in dependence on the requirements of EN ISO 14555 with satisfactory results as follows:

Drawn arc stud welding with ceramic ferrule

Welding details

| | |
|-----------------------------------|--|
| Process: | 783 - Drawn arc stud welding with ceramic ferrule |
| Joint type: | Stud arc weld |
| Parent metal: | Stud: MI M8-D10,5x17 St 37-3k (class 4.8). Ceramicring: KSP-F 16. Plate: S960QL (mat.no. 1.8933) acc. EN 10025-6. |
| Test piece thickness [mm]: | Stud diameter: 10,5 (M8 inside diameter) Plate: 6,0 & 12,0 |
| Outside diameter [mm]: | --- |
| Filler metal type: | --- |
| Shielding gas/flux: | --- |
| Current/polarity: | Current source: Köco 1500 E (= +) |
| Welding position: | PA |
| Weld built-up: | Stud arc weld |
| Preheat: | Without preheating |
| Post-weld heat treatment: | As welded |
| Date of welding: | 2018-06-27 |
| Welders: | Operators with valid test certificates in the respective test group |
| Other information: | Testreport: element no.: 18 08 024 S and 18 08 025 S dd. 2018-08-29. |

Range of application

| | |
|----------------------------------|--|
| Joint type: | Stud arc weld |
| Parent metal(s): | Plate base material: steel grades of (sub) group 3.1 & 3.2 ($ReH \leq 960$ N/mm ²). Stud material: steel grades of (sub) group 1.1 ($ReH \leq 275$ N/mm ²) acc. CEN ISO/TR 15608. |
| Metal thickness(es) [mm]: | Plate thickness $\geq 1,5$ |
| Outside diameter [mm]: | Stud diameter: 10,5 |
| Welding position(s): | PA |
| Post-weld heat treatment: | As welded. Heat input as for the welding procedure test. |
| Remarks: | Welding procedure tests had been carried out in dependence to EN ISO 14555. The remarks regarding quality assurance acc. item 14 of EN ISO 14555 as well as the regulations and recommendations of the manufacturers of the base material and the stud material regarding drawn arc stud welding with ceramic ferrule have to be observed. Weld area dry and clean, free of shop primer. |
